

PUIDUKRUVI C4, PEITPEA, C4 PINNATÖÖTLUSEGA

ESSVE puidukruvi on mõeldud enamikuks paigaldustöödeks puitlaastplaatide, puidu, plasti, tüüblite jmt puhul.

KIRJELDUS

Kruvi on valmistatud karastatud terasest ja sel on CorrSeali pinnatöötlus (sobib väliskeskkondadele). Kruvil on TX-kinnitus/-pesa.

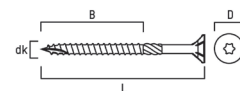

Kruvile on lisatud kiulõiketera. See kindlustab puitmaterjalides madala sissekrüvimismomendi ning vähendab pragude tekkimist.

Kruvidel, mis on 40 mm ja pikemad, on kohe tavalise puidukeerne järel täiendav freeskeere, et lihtsustada paigaldamist.

Kruvipeale on lisatud kuus lõikesoont, mis süvistavad kruvi ning jätavad sileda, pindudeta pinna. Kruvi vastab CE-märgise nõuetele standardi EN 14592 kohaselt.

PAIGALDUSJUHEND

Soovitav pöörete arv: 400–1200 p/min.
