

CONSTRUCTION SCREW ET-T, CORRSEAL

AREA OF USE

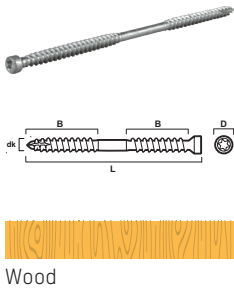

ESSVE Construction Screw ET-T is designed for joining wooden joists such as Cross Laminated timber (CLT), glulam, LVL, and construction timber, both indoors and outdoors. It is a single-step installation making it highly efficient for timber assembly. Using three ET-T screws can replace one wood connector and 18 wood connector screws, significantly reducing assembly time. When installing outdoors, ensure the wood is dry and frost-free.

DESCRIPTION

The screw is equipped with one fibre cut at the point which reduces the drive-in torque and minimises splitting. Manufactured of hardened carbon steel and C4 classified surface treatment Silver CorrSeal. *ESSVE Construction Screw ET-T meets the CE requirements as specified in ETA-23/0747.*

INSTALLATION INSTRUCTIONS

Use ESSVE's specific system bits for a safe installation. Fit the system bits without the a bit adapter directly in the chuck. Consequently, screw installation must take place at a constant torque without stopping. Use a strong power driver for the best installation. A power screwdriver with variable speed control is recommended when installing in hard woods. Recommended rpm: 250-800/min.

Specification	
Surface treatment	CorrSeal
Main Materials	Steel
Corrosion resistance class	C4
Application environment	Outdoors
